

Advanced Intuitive Development Practicum

Review and Expand Intuitive Reading Skills For Success, Healing & Creativity

“Intuition is a rich resource for acquiring knowledge about yourself and the world around you. It can offer guidance that allows you to make the best choices for yourself. When you listen to intuition and follow its wisdom, you will be led to a life that is full, successful, and rich with limitless possibilities.”

“Intuition — A form of direct knowing and perception that is akin to instinct or divining empathy, that gives revelation by direct insight into reality as it is, in itself, absolutely, without reasoning, inferring or rational thought.”

WEBSTERS' DICTIONARY

The intent of this Advanced Intuitive Development Practicum is a thorough review of how to access intuitive information and how to do intuitive readings for self and others. Areas covered will be relationships and telepathic cording, personal essence and blocks, family dynamics, career and life goals, chakra alignment, subpersonalities, communication with the Inner Child and Higher Self, emotional well-being, and psychic self-protection. Hopefully there will be time to explore basic Principles of Manifestation

Focus will be on opening intuitive channels and clearing them of emotions, projections and core beliefs, inhibiting clear reception of intuitive insights. Expressive Art tools of movement, art, writing and sound will be utilized to help free intuitive channels and to inspire creativity.

In supportive dyads and small group processes, we will practice offering insightful intuitive guidance for one another's personal issues. Review will include third party – remote readings, teacher demonstration and extensive feedback.
